PET CUPS

One Series. Multiple Sizes. Total Beverage Flexibility.

A complete PET cold cup portfolio combining Common Rim and Regular series to simplify operations while maximizing beverage presentation and branding impact.

Simplify inventory with a common lid

1 common lid across 5 cup sizes means easier purchasing, optimized storage, and streamlined back-of-house operations.

Turn Every Cup Into a Billboard.

Premium custom-printed PET cups delivering strong brand visibility while maintaining clarity and performance.

Enhance beverage presentation

High-clarity PET showcases drinks with maximum visibility, helping improve perceived quality and support merchandising at point of sale.

Support sustainability goals

Made from 100% recyclable PET and manufactured in North America to support responsible sourcing and supply chain reliability.

COLD CUP LIDS

Seal It.

Serve It. Sip It.

Comprehensive cold beverage lid series including flat, dome, sip-thru and flavour-button formats.

Secure seal for confident transport

Designed for a tight, leak-resistant fit to help minimize spills and support reliable performance in high-volume beverage environments.

Multiple formats for every beverage type

Flat, dome, and sip-through options support everything from soft drinks to specialty beverages, ensuring the right lid for each application.

Simplify inventory with cross-platform compatibility

Compatible with multiple lid series and cup formats, allowing branded cups to integrate easily into existing options.

Quick identification with flavour button options

Flavour-button lids make it easy to identify beverages at a glance, helping improve order accuracy and service efficiency.

HOT DRINK LIDS

Confident Fit. Clean Sip.

Engineered hot beverage lids designed for secure fit, smooth sipping, and a professional hand-off experience.

Secure fit to reduce leaks and spills

Designed to snap tightly onto compatible cups, helping minimize leaks during transport and ensuring a confident hand-off.

Designed for a smooth sipping experience

Multiple drinking formats including dome, fold-back, and pull-n-sip to support comfort, control, and a better end-user experience.

Compatible across multiple cup sizes

Versatile lid options designed to fit a range of cup sizes, helping reduce SKU complexity and simplify inventory management.

Durable construction for hot beverage service

Made from HIPS and PP to maintain performance under heat while supporting consistent use in high-volume environments.

PORTION CUPS & LIDS

Perfect Portions. Built to Perform.

PP portion bases paired with clear PET lids delivering rigidity, leak resistance, and consistent portion control.

Engineered for consistent portion control

Designed to deliver accurate, repeatable portioning to help control costs and maintain product consistency across locations.

Secure seal to prevent leaks and spills

Precision-fit PET lids snap tightly onto PP bases to help minimize leaks during transport, storage, and service.

Versatile sizes for multiple applications

Available in a range of sizes and color options to support dressings, sauces, samples, and a variety of portion-controlled uses.

Durable design for everyday use

Unique sidewall design provides added rigidity to withstand handling in fast-paced environments without cracking or deforming.

TAKE & GO™ CUPS & INSERTS

Smarter Snacking Starts Here.

Integrated cup, lid, and insert system designed for efficient assembly, strong merchandising impact, and reduced packaging material usage.

Streamlined assembly for faster prep

3-piece snap-fit system enables quick, intuitive assembly to support speed and consistency in high-volume environments.

Elevate merchandising with layered presentation

Insert options allow for clean separation of ingredients, helping maintain freshness while enhancing visual appeal at point of sale.

Compatible across cups

Designed to work across PET cup families, helping reduce SKU complexity and simplify sourcing across multiple menu offerings.

Reduce waste with integrated system design

All-in-one packaging solution helps minimize excess materials and supports more efficient packaging workflows.

HINGED CONTAINERS

Freshness That Sells Itself.

Crystal-clear hinged containers engineered for durability, food safety, and strong shelf appeal across grab-and-go categories.

Built for strength and product protection

Ribbed sidewalls provide added structural integrity to help reduce damage during handling, transport, and in-store merchandising.

Secure seal for leak resistance

Designed with a tight, leak-resistant closure to help maintain freshness and minimize spills in high-turn foodservice and retail environments.

Optimized for display and stacking

Stackable design supports efficient merchandising while maintaining product visibility and maximizing shelf space.

Easy-open design for convenience

Perforated hinges currently allows for smooth opening without compromising package integrity, improving the end-user experience.

STRAWS

Sustainable Solutions Without Compromise.

A complete portfolio of biodegradable, compostable, plant-based, and paper straw solutions engineered for performance and environmental responsibility.

Meet evolving regulatory requirements with confidence

Portfolio includes ASTM D6400 compostable, BPI-certified, and marine biodegradable options to support compliance across diverse regional regulations.

Multiple formats for every beverage application

Available in a range of diameters and formats to support everything from soft drinks to specialty beverages.

Sustainable materials without sacrificing performance

Engineered to maintain durability and usability across beverage types, helping ensure a consistent customer experience.

Flexible portfolio to support sustainability goals

Includes compostable, biodegradable, and paper options, allowing operators to align packaging choices with their environmental initiatives.

CUSTOM ORDERS

Branded For Your Business

Turn every order into advertising. Add your logo, colours, and messaging across cups, lids, and containers to carry your brand wherever your product goes.

Customizable products

Printed Cups

Our printed cups will put your brand front and centre. You can choose the size, colour, and artwork—upload your logo, phrase, or design, and our experts will apply it straight to the cup surface. Our cups are 100% recyclable and come in a variety of sizes.

Coloured Straws

Use coloured straws to make your drinks stand out. Choose from a wide range of colours and sizes to fit your brand's identity or product theme. Whether you want a single brilliant colour or a set that coordinates with your seasonal campaign, coloured straws are a simple yet eye-catching addition.

Wrapped Printed Straws

Each straw is carefully wrapped in a custom-printed sleeve—you may choose the colours, designs, or message that will appear on each straw. Ideal for making a big visual impact while keeping straws sterile.

Embossed Food Packaging

Stand out with quality embossed packaging and lids. We can emboss your logo, pattern, or message on hinged containers, portion cups, and lids, adding texture and sophistication without the use of ink.

INNOVATION

OUR PROCESS

1. Discovery & Research

We identify customer needs, market trends and opportunities to develop innovative packaging solutions.

2. Concept Development

We brainstorm and sketch potential solutions, turning initial ideas into practical product concepts.

3. Customer Assessment

We review proposed concepts with customers, gathering feedback to select the best solution.

4. Design Development

We refine the selected concept using 3D design tools, preparing detailed designs for customer approval.

5. Prototyping

We produce physical prototypes to evaluate the design and gather customer feedback.

6. Testing & Validation

We test and refine prototypes to ensure they meet performance requirements and customer expectations.

7. Production

We review first-off samples, make final adjustments and prepare the approved product for manufacturing.

WHAT'S NEXT

Tamper Evident Container

- **Integrated tamper-evident locking design** provides visible indication of opening for added food security.
- **Secure perimeter seal** helps maintain freshness and minimize leaks and spills.
- **One-piece hinged construction** keeps the lid attached after opening, with no loose plastic components.
- **Easy-open and re-closeable design** offers convenience for customers.
- **Crystal-clear construction** showcases contents and enhances shelf appeal.
- **Stackable design** supports efficient storage, transport and merchandising.
- **100% recyclable PET construction** supports sustainability goals.

FAQS

Have a question? We're here to help.

View our most commonly asked questions here. If you have more questions, contact us at sales@amhil.com today.

What custom packaging options does Amhil offer?

Amhil provides a wide range of custom food packaging solutions including printed cups, wrapped custom-printed straws, coloured straws, embossed food packaging, and engraved lids. You can add your logo, colours, messaging, and brand artwork to cups, lids, containers, and more to elevate your brand visibility on every order.

Can Amhil help with completely new product development?

Yes. We collaborate with customers from concept to product launch, including sketching designs, prototyping, testing, and full product development tailored to your specific business needs and challenges. This helps ensure the custom packaging solution is functional, sustainable, and aligned with your brand goals.

Is there a minimum order quantity (MOQ) or pricing structure for custom orders?

MOQ and pricing for custom packaging orders depend on the product, material, and level of customization requested. We work with each customer individually to determine suitable order volumes, pricing, and production timelines based on your specific needs. Contact a sales representative to get a tailored quote.

How does the custom order process work?

The custom order process begins when you send your artwork, logo, slogans, or brand assets to us. Our graphics team then develops a customized design that best fits your food packaging product. After reviewing product specs with you to ensure goals are met, production is scheduled, manufactured at scale, and coordinated for on-time delivery.

How do I prepare my artwork for custom printing?

To start a custom order, you should provide high-resolution artwork files, logo graphics, brand colours, and design guidelines. This allows our design team to properly position and optimize artwork for products such as cups, lids, and containers. Clear files and specifications help speed up design approval and production.

How long does it take to complete a custom packaging order?

Production time varies depending on design complexity, material choice, and order size. Once product specifications are confirmed, we schedule production, manufacture your order, and coordinate logistics for timely delivery.

THE AMHIL DIFFERENCE

Flexible

We work closely with our clients to meet their timeline, product and industry needs.

Reliable

We build with performance in mind. We're proud to have a defect rate of less than 0.01%.

Sustainable

We incorporate eco-conscious materials and circular solutions without compromising on performance.

Quality-Driven

We don't just protect your product. We maintain your reputation and your customers' trust.

A Leader in Food Packaging

Our mission is to offer smart, safe, sustainable packaging solutions based on the principles of the circular economy. We strive to be the go-to partner for successful, sustainable packaging.
